Process_175iwec Simulation Report

Simulation Start Date : 01/04/2021 09:48:00

Simulation End Date : 07/04/2021 03:48:00

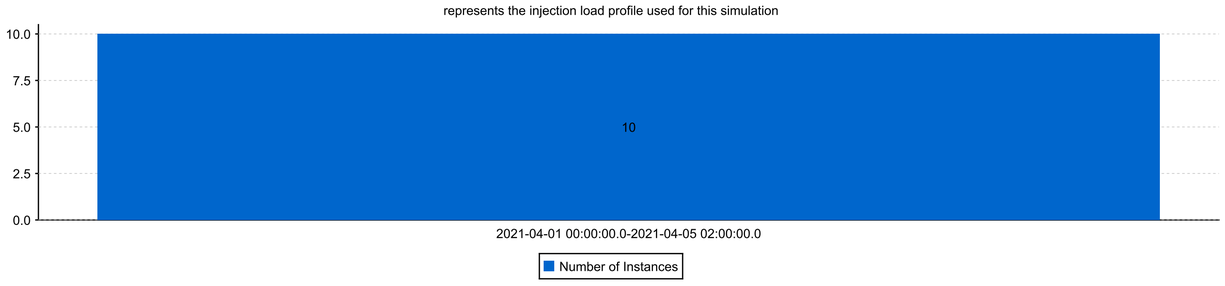
Simulation Duration : 6 days 6 hours

Execution time : 5 seconds

Number of simulated Instances : 10

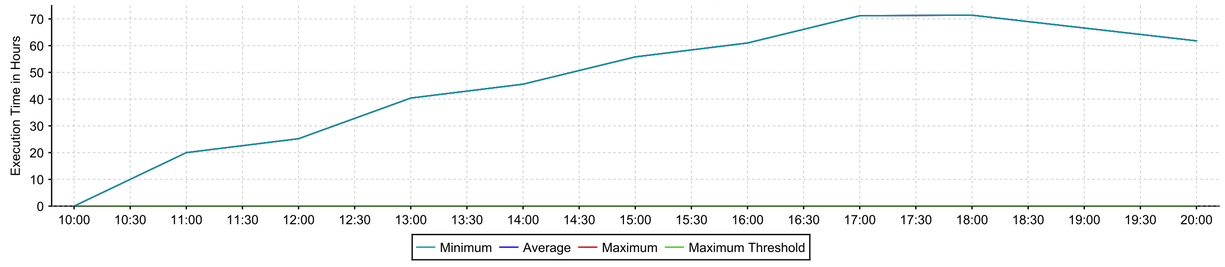
Load Profile

represents the injection load profile used for this simulation



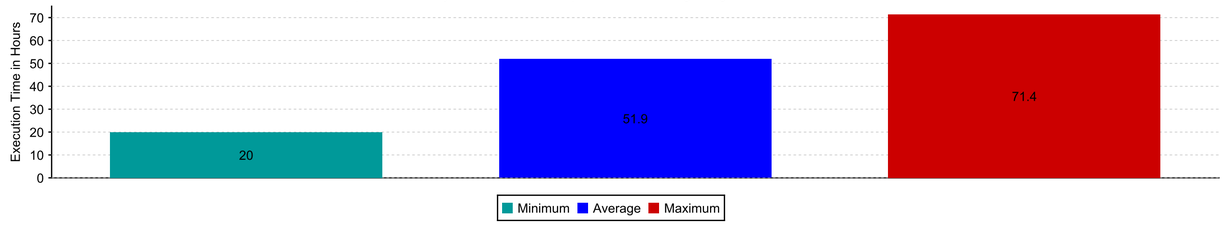
Process_175iwec Instances Execution Time

represents the execution times of simulated process instances through the total simulation timespan



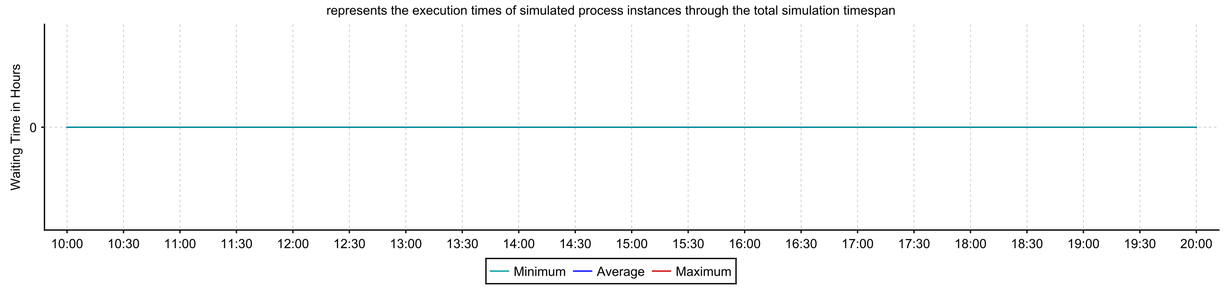
Process_175iwec Execution Times By Instance

represents the key execution times of a process instance regarding all the executed instances



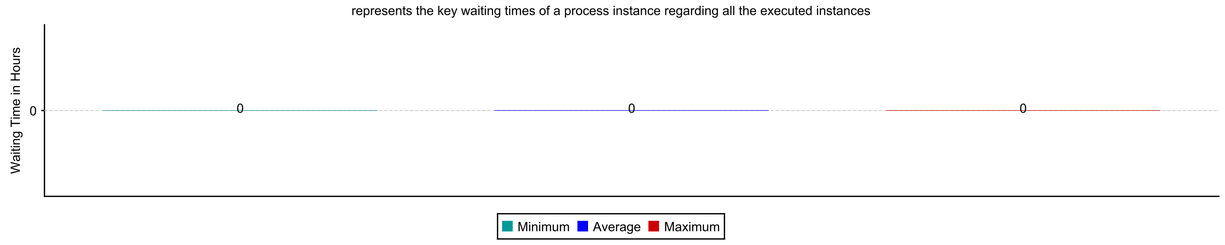
Process_175iwec Instances Waiting Time

represents the execution times of simulated process instances through the total simulation timespan



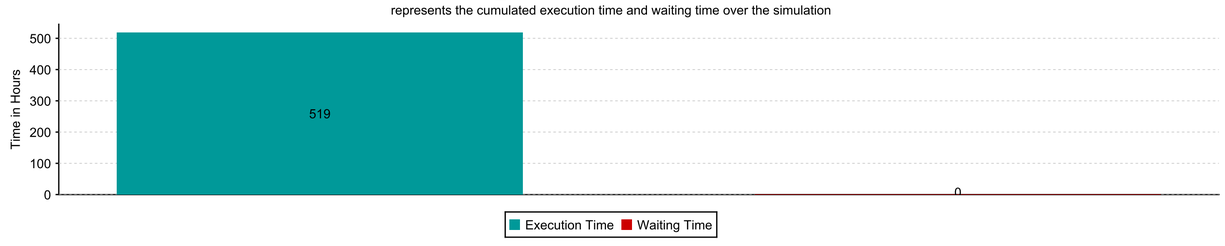
Process_175iwec Waiting Times By Instance

represents the key waiting times of a process instance regarding all the executed instances



Process_175iwec Instances Cumulated Time

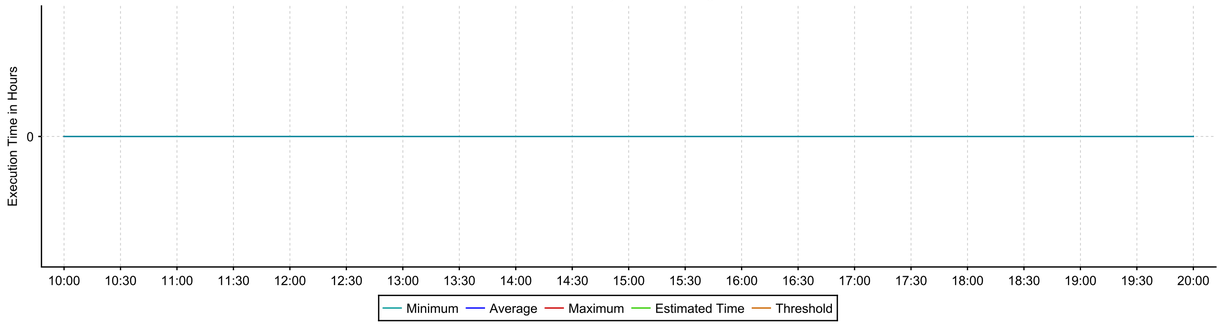
represents the cumulated execution time and waiting time over the simulation



Event_06rvxzf Report

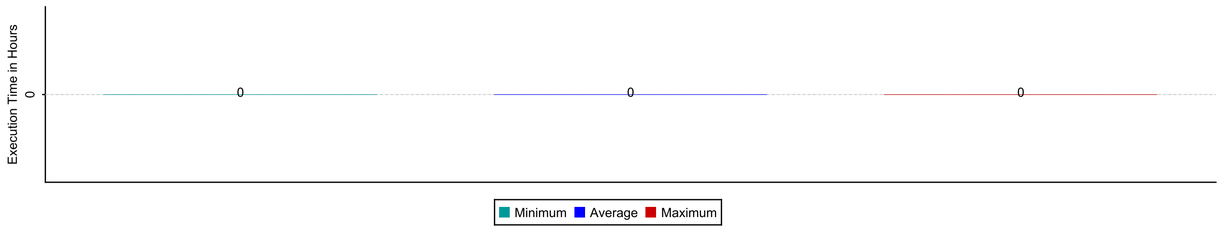
Event_06rvxzf Instances Execution Time

represents the execution times of simulated activity instances through the total simulation timespan



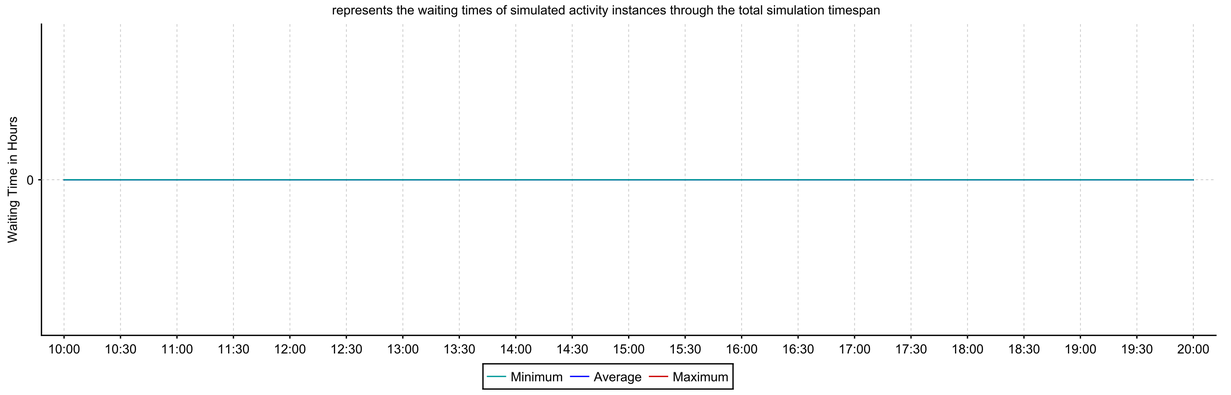
Event_06rvxzf Execution Time By Instance

represents the key execution times of an activity instance regarding all the executed instances



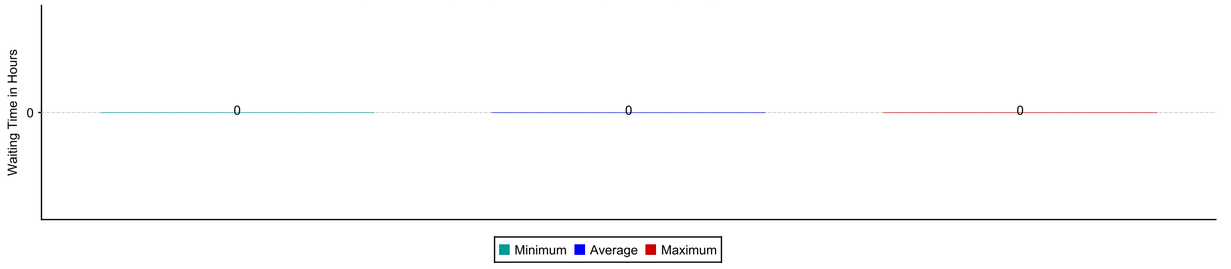
Event_06rvxzf Instances Waiting Time

represents the waiting times of simulated activity instances through the total simulation timespan



Event_06rvxzf Waiting Time By Instance

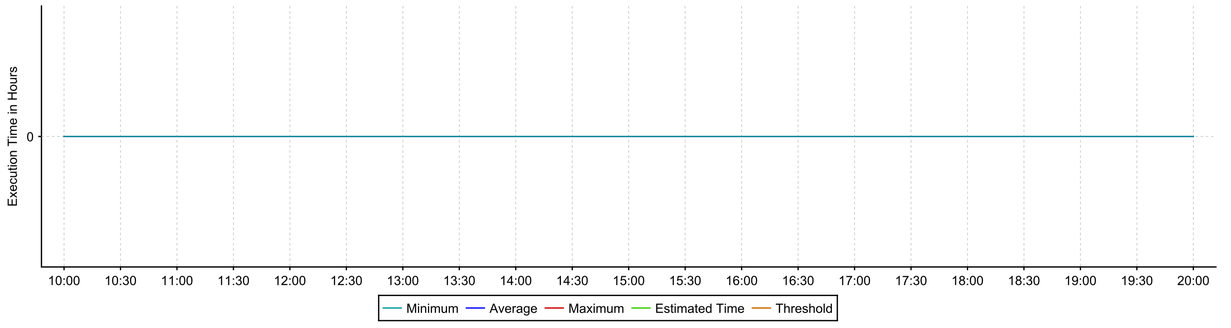
represents the key waiting times of an activity instance regarding all the executed instances



StartEvent_1tg4z5d Report

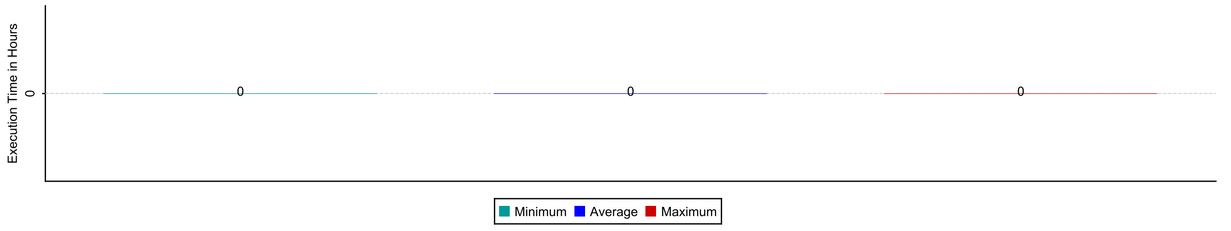
StartEvent_1tg4z5d Instances Execution Time

represents the execution times of simulated activity instances through the total simulation timespan



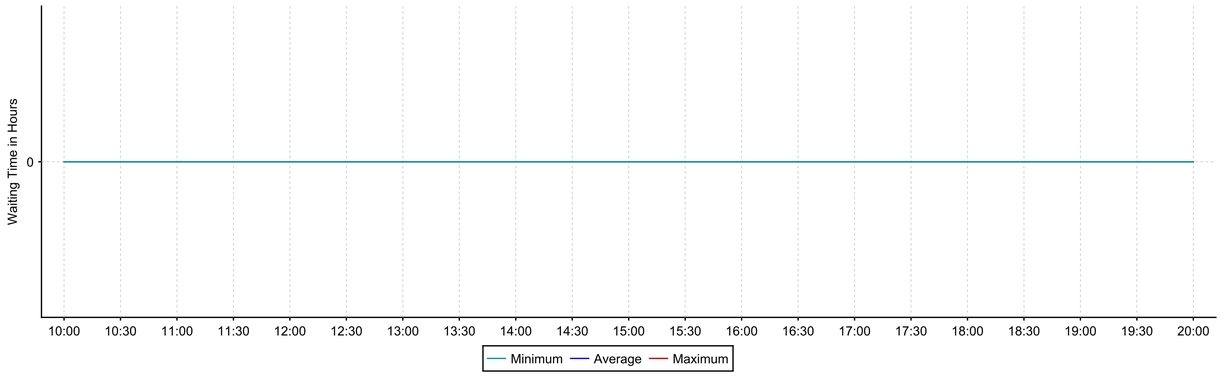
StartEvent_1tg4z5d Execution Time By Instance

represents the key execution times of an activity instance regarding all the executed instances



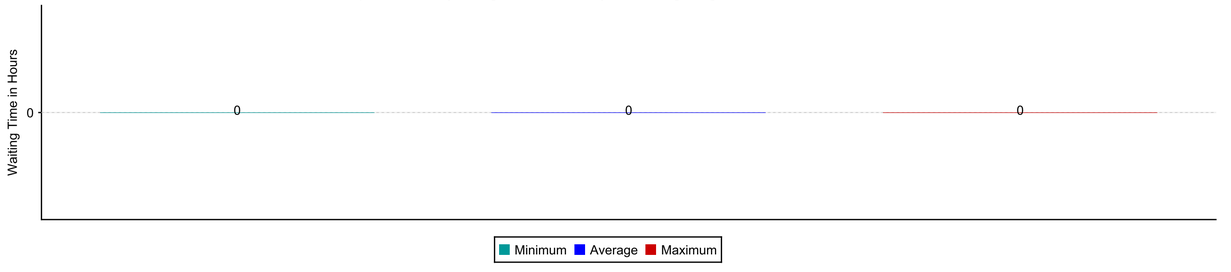
StartEvent_1tg4z5d Instances Waiting Time

represents the waiting times of simulated activity instances through the total simulation timespan



StartEvent_1tg4z5d Waiting Time By Instance

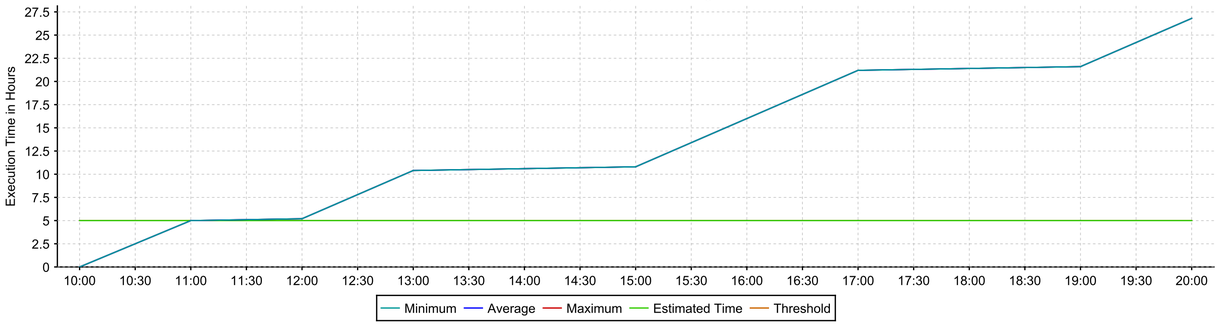
represents the key waiting times of an activity instance regarding all the executed instances



Task1 Report

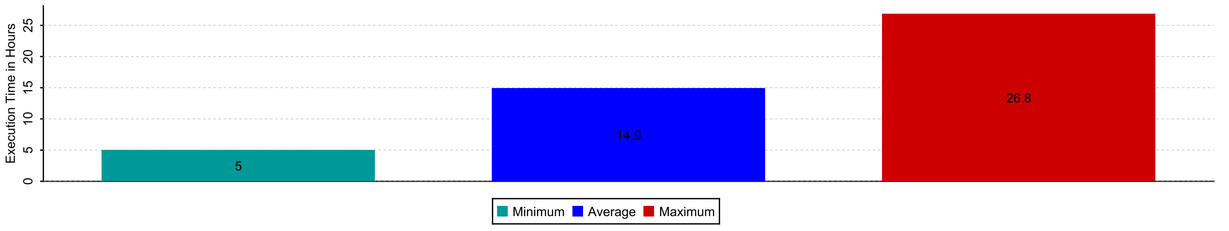
Task1 Instances Execution Time

represents the execution times of simulated activity instances through the total simulation timespan



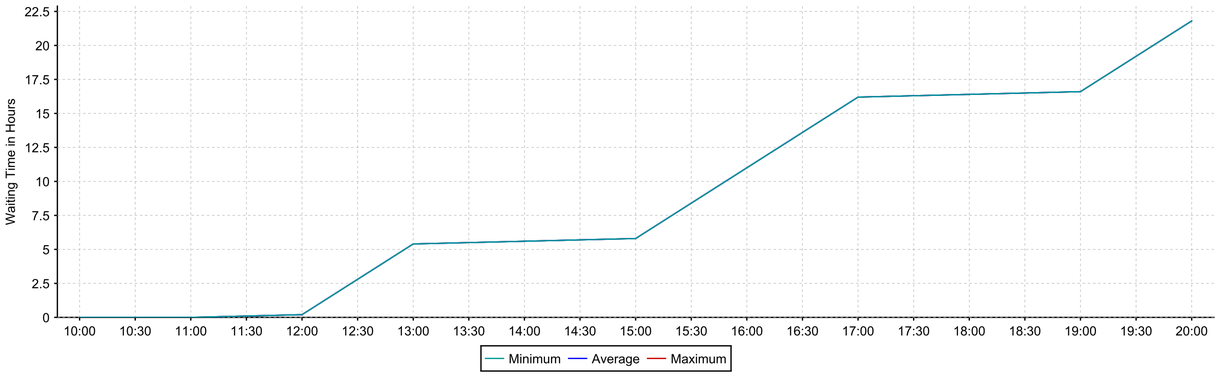
Task1 Execution Time By Instance

represents the key execution times of an activity instance regarding all the executed instances



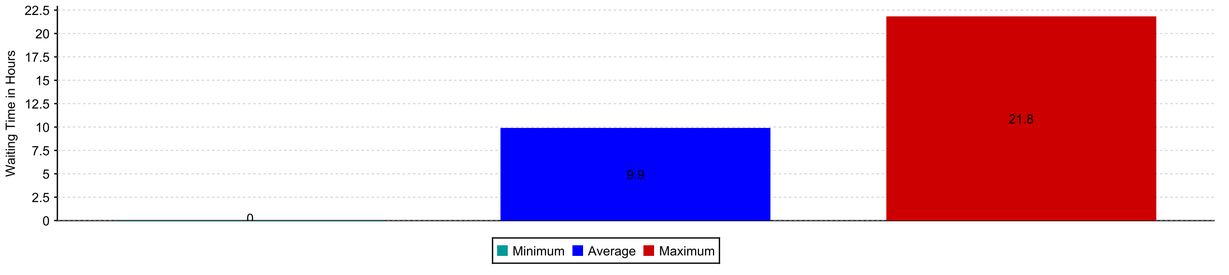
Task1 Instances Waiting Time

represents the waiting times of simulated activity instances through the total simulation timespan



Task1 Waiting Time By Instance

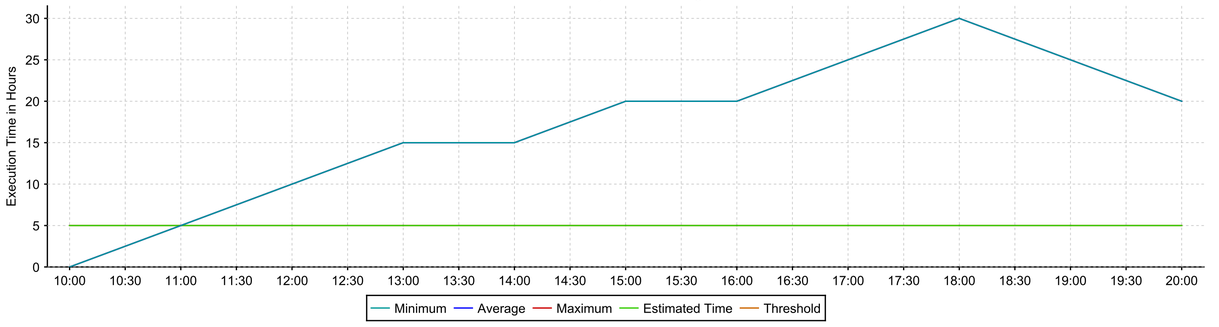
represents the key waiting times of an activity instance regarding all the executed instances



Task2 Report

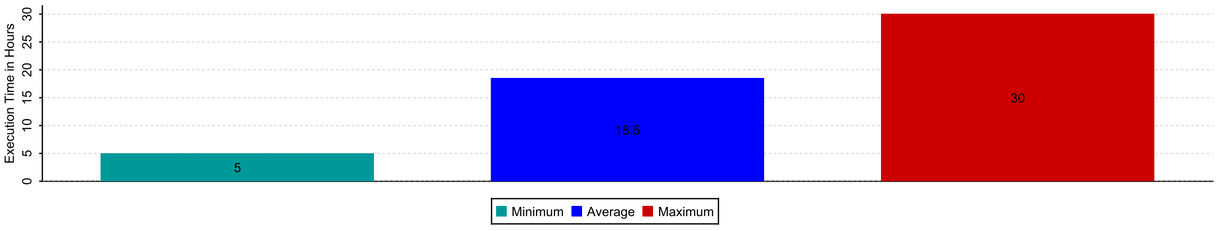
Task2 Instances Execution Time

represents the execution times of simulated activity instances through the total simulation timespan



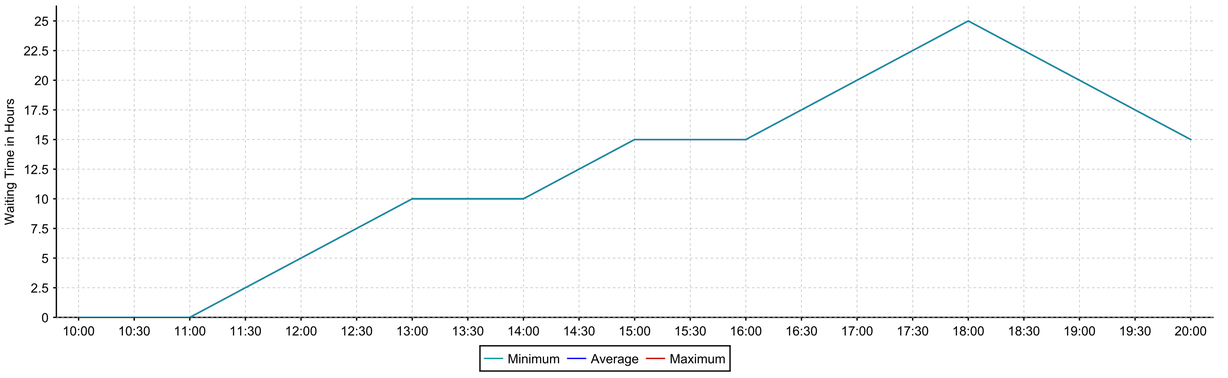
Task2 Execution Time By Instance

represents the key execution times of an activity instance regarding all the executed instances



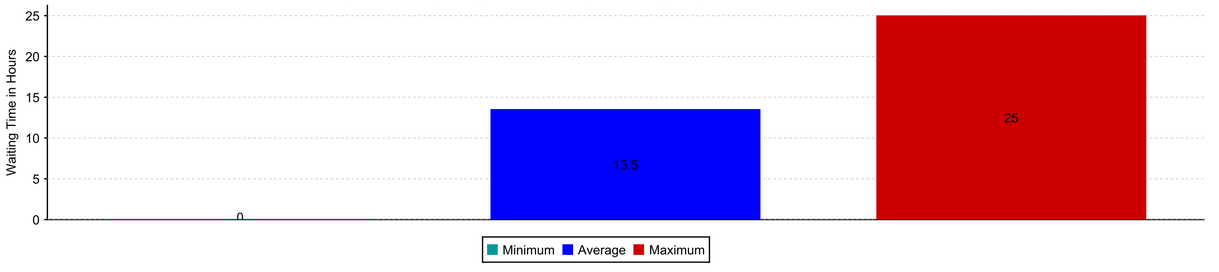
Task2 Instances Waiting Time

represents the waiting times of simulated activity instances through the total simulation timespan



Task2 Waiting Time By Instance

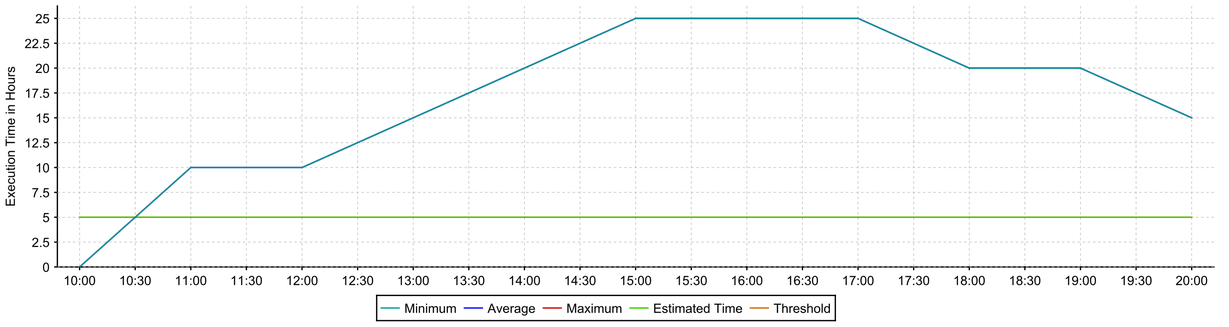
represents the key waiting times of an activity instance regarding all the executed instances



Task3 Report

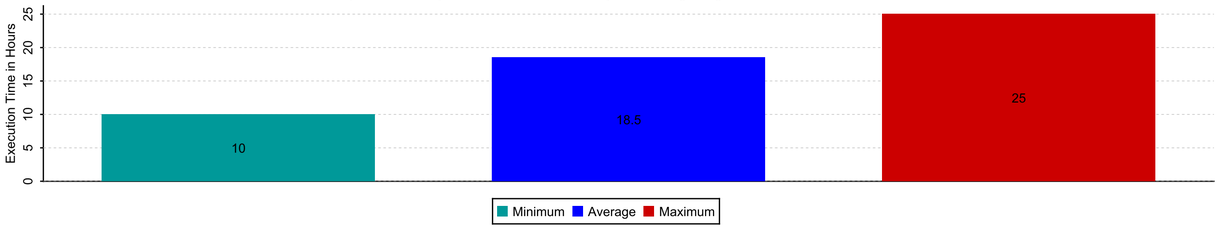
Task3 Instances Execution Time

represents the execution times of simulated activity instances through the total simulation timespan



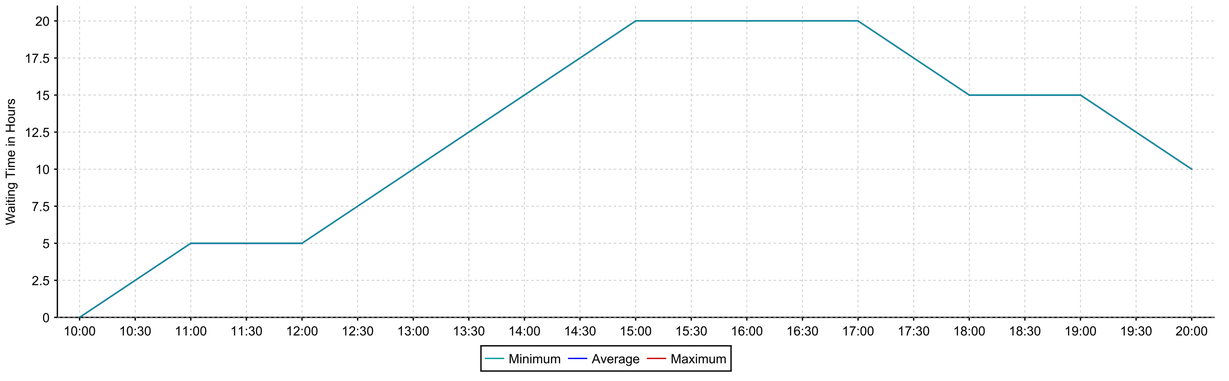
Task3 Execution Time By Instance

represents the key execution times of an activity instance regarding all the executed instances



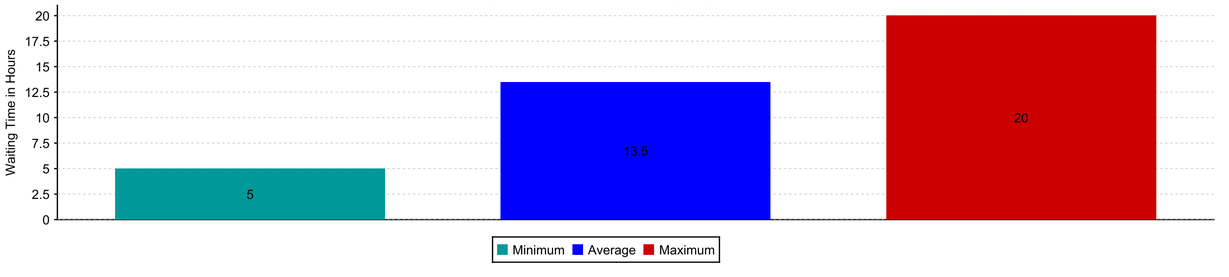
Task3 Instances Waiting Time

represents the waiting times of simulated activity instances through the total simulation timespan



Task3 Waiting Time By Instance

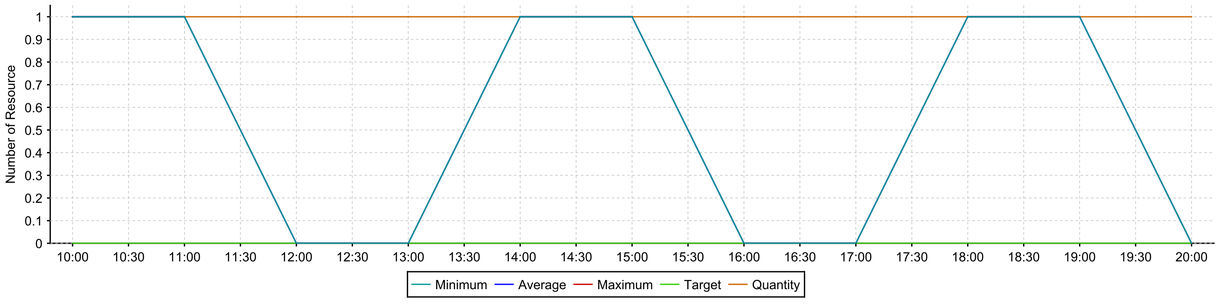
represents the key waiting times of an activity instance regarding all the executed instances



Resource_1 Report

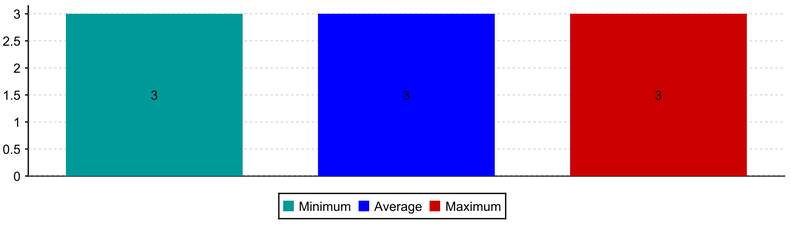
Resource_1 Consumption

represents the number of resource instance used through the total simulation timespan



Resource_1 Consumption By Instance

represents the key figures of the resource consumption for a process instance reagrding all the executed instances

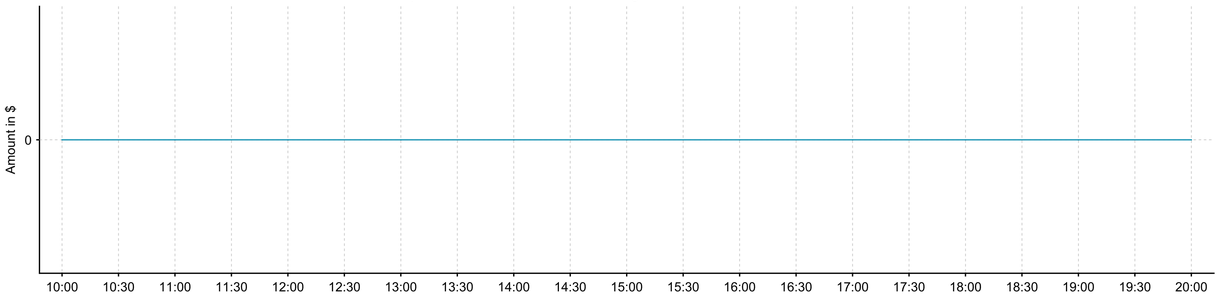


Resource_1 Total Consumption

represents the global resource consumption

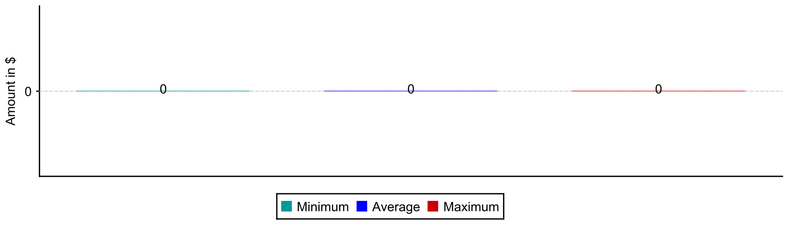
Resource_1 Cost

represents the cost of the resource through the total simulation timespan



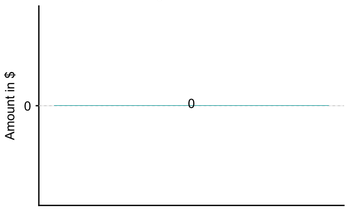
Resource_1 Cost By Instance

represents the key figures of the resource cost for a process instance reagrding all the executed instances



Resource_1 Total Cost

represents the global resource cost

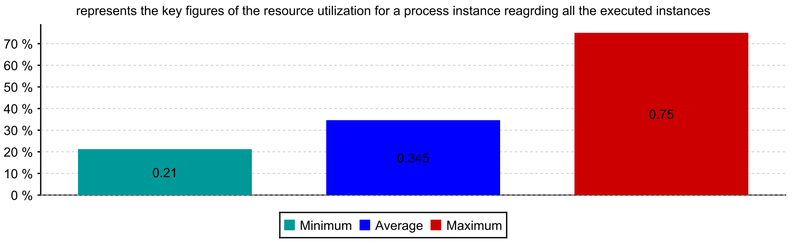


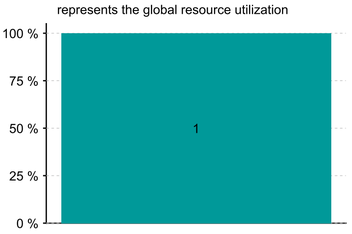
Resource_1 Utilization

represents the rate of utilization of the resource through the total simulation timespan

Resource_1 Utilization By Instance

represents the key figures of the resource utilization for a process instance reagrding all the executed instances



Resource_1 Total Utilization


represents the global resource utilization
